Canon

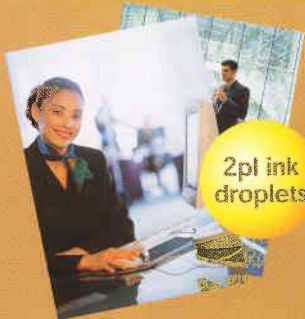

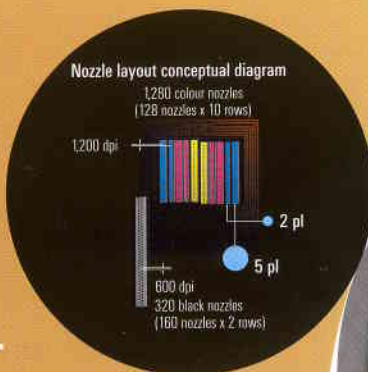

Photo printing...

Canon's **MicroFine Droplet Technology** allows the MP700 and MP730's print heads to eject both ultra-fine **2-picolitre and 5-picolitre** ink droplets. This achieves colour gradations equivalent to 6-ink colours and produces high-quality, grainless prints, while the rich dynamic range ensures sharp image quality with high colour saturation. The **1200 dpi high-density** head for precision dot placement gives crystal clear **4800 x 1200 dpi resolution**. Borderless prints and copies are available from 4 x 6" right up to A4 size.

When it comes to printing, the MP700 and MP730 outpace even single-function machines - you'll get **perfect borderless 4 x 6" photo prints** in as little as **47 seconds**. Both machines perform at an astonishingly fast **speed of 22 pages per minute for monochrome** and **14 pages per minute for colour**. The ultra-wide **multi-nozzle** print head has **1066 nozzles** and is capable of ejecting approximately **19 million ink droplets per second** for incredibly sharp prints. At the same time, a **4-motor system** improves performance by allowing **high-speed paper feeding and relay feeding** for fast and continuous printing.

Efficient, high

Compatible memory cards

1. Compact Flash card

2. Smart Media 3. Memory Stick

4. SD card / Multimedia card

4-in-1 multi-slot

... directly digital

Direct digital... Print direct from digital format, with the MP700 and MP730's **Card Direct** function. The **multi-card slots** on each machine accept various memory cards and no **PCMCIA adapter** is needed. Compatible memory cards are the Compact Flash (type I and II), Memory Stick, multimedia card, smart media and SD memory cards.

convenience

precise, sharp

Copy without a PC - super sharp, super quick

With the MP700 and MP730, you don't even need to be connected to a PC to copy documents at blazing speeds of **22 pages per minute for monochrome**, and **14 pages per minute for colour**. Choose between advanced copy features such as image repeat, mirror image, **2-on-1** and **entire image copying**. These machines also offer you excellent **photo-quality borderless copy** resolution of **1200 x 1200 dpi**.

n-speed printing

arp, quick

...and much more

High quality scanning

The MP700 and MP730 come equipped with a vast range of scanning capabilities. A **multi-scan/multi-crop** mode allows you to scan or **crop several photos** at a time, with separate files created for each image. Slightly skewed photos will be automatically aligned. You can also **scan two or more pages at once** and save them into a single **PDF file**. In addition, optical resolution is a sharp **1200 x 2400 dpi**, which can be enhanced up to a **stunning 9600 dpi**. If that isn't enough to make you **sing**, you can also set up the machines to **play music** while you're scanning, or choose a sound to play when scanning is completed.

Productive colour fax capability with built-in ADF

The **MP730** has a **fax function** that makes use of a speedy **33.6Kbps** modem, allowing you to **fast-fax** at just **3 seconds** per page. You can also store up to **100 frequently dialled** numbers in its memory, thanks to the speed dial feature, or enjoy the convenience of **one-touch, coded and group dialling**. Plus it's equipped to **fax up to 30 sheets** at a time with the **automatic document feeder**. This ensures smooth and speedy paper feeding, whether you're sending a multi-page fax or scanning a selection of documents, and helps to finish the job more quickly.

Versatile software for accurate photo printing

Input camera setting and image scene data directly from your digital camera with the bundled **Easy-PhotoPrint software**, that supports **Exif Print** and **YCC colour space**. Images are printed out accurately and colours in the original images are faithfully reproduced even when they exceed the sRGB range. A **Photo-Noise Reduction** function also eliminates noise in digital camera images, particularly from areas of light solid colour such as blue skies, and from dark areas such as shadows, to create **natural-looking images**. On top of that, the MP700 and MP730 are also bundled with indispensable software such as **Easy-WebPrint**.

Conveniently cost effective

With Canon's **individual ink tanks** system and ink level detection system, there is **no wastage** and operating **costs are kept low**.
