PIXMA – Welcome To The Era Of Photo Perfection!

In the evolution of inkjet printing, PIXMA is a radical revolution – a faultless printing experience that is fast, fun and affordable. In the Age of PIXMA, photos are perfect and printing is fast and easy! With such radical advances as the **FINE print head**, sophisticated **photo software packages**, and even more **creative media**, PIXMA is the ideal addition to the All-in-One printer!

Canon's FINE Technology Print Head – Amazing Speed, Exceptional Precision

Canon PIXMA printers incorporate the **Full Photo-Lithography Inkjet Nozzle Engineering (FINE) technology print head**, which has more nozzles than competitors' equivalent models. Ink droplets are ejected at consistent, fixed volumes with remarkable accuracy for smoother, grain-free images. And FINE print heads achieve amazing speeds by covering a wider area in a single pass. High speed, high resolution, and high quality. That's perfectly FINE with Canon!

The Perfect Photo Lab

With the MP780, you can print brilliant, professional-quality photos right in the office.

- **1856-nozzle FINE print head** – facilitates exceptional precision and speed
- **2pl and 5pl ink droplets** – makes possible both high-quality images and high-speed photo printing.
- **4800 x 1200dpi** – ensures exceptional detail and a natural, grain-free tonality across the entire image
- **ContrastPLUS 5-colour ink system** –uses Photo Black ink to improve overall contrast, matching the image quality of 6-colour printers.

5-Colour Printing – Cost-Saving Individual Ink Tanks

Enjoy the beauty of 5-colour printing, as well as the cost saving Canon Individual Ink Tank System.

- **Individual Ink Tanks** – replace only the colour that has run out so you won't waste a drop
- **Advanced ink detection system** – no wasted printouts due to a depleted colour during a print job: just change the ink tank when prompted and continue printing!

Camera Direct Printing – Easy Connections, More Efficiency!

The MP780 supports **PictBridge** and **Bubble Jet Direct**. This means you can connect directly to any PictBridge- or Bubble Jet-compatible digital camera or video camcorder and print high-quality photos without using a computer.

Get It Done Faster: 25ppm Monochrome, 17ppm Colour

The MP780 races through documents and borderless prints – up to A4 size – without compromising quality!

- **Independent-drive four-motor system** – quicker, quieter, smoother operation
- **High-speed paper feeder** – faster, more efficient paper handling
- **25ppm monochrome and 17ppm colour** – high-speed printing and copying
- **4" x 6" borderless print in just 36 seconds** – in Draft mode with Photo Paper Plus Glossy

The Ease Of High-Speed, High-Quality Scanning

The MP780 employs an advanced CCD sensor that ensures maximum precision and breathtaking colour.

- **2400dpi resolution** – for exceptional detail
- **48-bit colour depth** – facilitates brilliant colours and precise colour matching
- **3D scanning** – increases your creative options
- **USB 2.0 Hi-Speed interface** – for faster, more accurate data transfer

The Fax Speaks For Itself: Fast And Efficient

Offering high-speed, ultra-convenient faxing, the MP780 is the consummate business solution.

- **Super G3 modem** – at 33Kbps, it transmits a fax in as little as 3 seconds
- **8 one-touch speed dials and 100 coded speed dials** – easy to access frequently dialed numbers
- **35-page Auto Document Feeder** – perfect for handling larger fax and copy jobs, and batch scanning.

Perfect Copies At Perfect Speeds

The MP780 makes copies that are every bit as impressive as the original!

- **Brilliant colour and sharp monochrome copies** – whatever the job calls for
- **17cpm colour / 25cpm monochrome** – now you can get your work done faster

Perfect For Business: Canon's Advanced Media Handling Technology

Just as business has evolved, so have your image, document and presentation needs. That's why Canon designed the MP780 to handle so much more than the simple office tasks of the past:

Auto Duplex Printing

Allows users to print on both sides of the paper, so professional documents which require binding can be printed even at home. Plain paper and photo paper can be used, and it works with both the Auto Sheet Feeder and the Paper Feed Cassette.

2-Way Paper Feeding / Paper Feed Switch

In addition to the Auto Sheet Feeder, a Paper Feed Cassette is built into the printer. A **Paper Feed Switch** allows you to shift easily from one feeder to another.

Load both plain paper and photo paper simultaneously, eliminating the need to load and re-load paper.

Load up to **300 sheets** at once (150 in the Auto Sheet Feeder and 150 in the Front Feeder) for high-volume printing.

DVD/CD Direct Printing

Printing directly onto a **DVD** or **CD** eliminates the need for labels. The built-in tray guide makes printing easier than ever.

New Media: More Creative, More Professional, More Fun!

Canon offers a fantastic array of photo media sure to satisfy even your most creative impulses. Now we're introducing new media to inspire you even further:

PP-101D Photo Paper Plus Double Sided – Print on both sides of this photo paper, and create uniquely beautiful photo albums and displays! A4 (10 sheets) & 5" x 7" (10 sheets)

PAK-101 Photo Album Kit – A stylish, navy-blue Photo Album that's perfect for displaying your most precious images! Includes Photo Paper Plus Double Sided: A4 (10 sheets) & 5" x 7" (10 sheets)

GP-401 Credit Card Size Glossy Photo Paper – Turn favourite photos of your loved ones into beautiful, wallet-sized prints to carry with you anywhere! (100 sheets)
