BUBBLE JET PRINTER

4800dpi

9ppm colour

5pl ink droplets

12ppm monochrome

## GET INTO SHAPE!

The Canon **xnu** i255 has a splendid new shape that fits beautifully into your home or office: the shape of high-speed photo perfection! It features a compact, cube-inspired form with gently rounded corners in a titanium white and dark grey colour scheme. But its beauty is more than skin deep. The affordable **xnu** i255 offers ultra-high 4800dpi\*<sup>1</sup> resolution and 5pl ink droplets\*<sup>2</sup> for extremely fine image detail; Easy-PhotoPrint and Vivid Photo technology for breathtaking colour photos; and the exciting speeds of 12ppm monochrome and 9ppm colour. The Canon **xnu** i255 – it will get you into shape!

\*<sup>1</sup> Ink droplets can be placed with a pitch of 1/4800 inch at minimum.

\*<sup>2</sup> Prints with 5pl ink droplets in all colour printing modes.

## EXCEPTIONAL IMAGE QUALITY

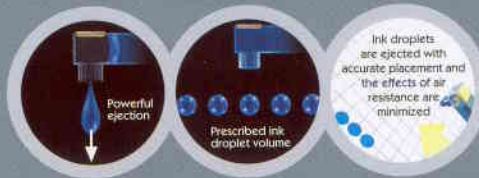

photo-quality  
printing

### New MicroFine Droplet Technology Shapes 5pl Ink Droplets!

The **XNU** i255 incorporates Canon's New MicroFine Droplet Technology to produce microscopic 5pl ink droplets. These droplets are placed with extreme accuracy, thanks to its advanced, multi-nozzle print head. The result is exceptional precision and detail, uniform density of dot coverage and consistent photo quality.

### True 4800 x 1200dpi Resolution

Extremely smooth tonal gradations, fine detail and exceptional accuracy are further supported by true 4800 x 1200dpi resolution.

### Pigment-Based Black Ink For Laser-Sharp Text

The **XNU** i255 uses high-density, pigment-based black ink to ensure extremely sharp text. Now all your monochrome documents will be impressively clean and professional.

### Brilliant, High-Intensity Inks

To achieve the best photo image, the **XNU** i255 uses high-intensity inks that produce sharper contrast, more vivid colours, and more clearly defined blacks – even on plain paper!

## HIGH SPEED, HIGH PERFORMANCE!

From monochrome documents to full-colour photo prints,  
the **xnu** i255 gets any job done fast without compromising quality:

- high-density, multi-nozzle print head designed for high-speed printing
  - 12ppm monochrome and 9ppm colour
- 8 x 10" photo print on plain paper is output in about 100 seconds!

## DIGITAL PHOTO PRINTING MADE PERFECT

### Canon's Easy-PhotoPrint

Easy-PhotoPrint makes it easy for you to achieve professional-quality photos: just select an image, the paper size/type and the final print layout. The optimum driver settings are automatically chosen, ensuring extraordinary prints.

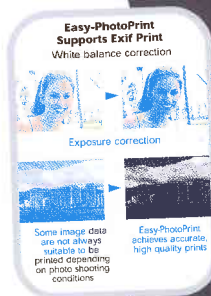

### Supports Exif Print

With Exif Print, data based on digital camera settings are stored with each shot. Easy PhotoPrint then "translates" Exif Print data, allowing the **xnu** i255 to output exceptionally accurate, professional-quality photos.

### Supports YCC Colour Space

Digital cameras and printers have larger colour capabilities (YCC Colour Range) than typical computer monitors (sRGB Colour Range), so the **xnu** i255 has an updated driver that lets Easy PhotoPrint process digital images using their full colour range. Images are even more vibrant than those displayed on your PC monitor.

## VIVID PHOTO TECHNOLOGY – COLOURS TO THE MAX!

By expanding the colour range limited by sRGB matching, Vivid Photo gives colours a new life. The **XNU** i255 maximises its colour reproduction capabilities – including richer greens and electric blues – so your photos will display the true vibrancy of the original scene.

Photo Noise Reduction

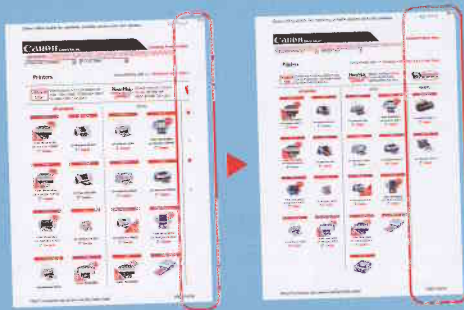

## ELIMINATING DIGITAL NOISE

Digital images are often plagued by “noise”, which shows up as rough speckles. This is especially obvious in smooth areas, such as sky. The **XNU** i255 features a Photo Noise Reduction mode that will eliminate noisy imperfections for smoother, more natural images.

## PRINT THE WHOLE PAGE WITH EASY-WEB PRINT

You will never be frustrated by printed web pages that have some of the information missing or cut off. With Easy-WebPrint, the **XNU** i255 prints the complete page without any hassle.\*

\*Windows only. Browser: Internet Explorer 5.5 or later.
