Brilliant Photo Quality Prints That Bring Your Pictures To Life

PRINT · COPY · SCAN · CARD DIRECT · PICTBRIDGE CAMERA DIRECT

* As on 10 Oct 2003 in Japan

Canon To All – Photo Solutions

Shoot. Connect. Direct Photo Printing.

Camera Direct Printing

Print directly from your PictBridge^{*1} or Canon Bubble Jet Direct-capable digital camera or digital video camcorder with a single cable – no PC required.

**1 PictBridge is a new industry standard for direct printing that allows you to print images without using a computer by directly connecting digital cameras and digital camcorders to a printer, regardless of the devices' brand and model.*

PictBridge/
Camera Direct

2 Easy setting of print parameters via the digital camera LCD monitor^{*2}

3 Camera Direct Printing

1 Ready to print after connecting cable

**2 Operation and LCD monitor interfaces will depend on the digital camera.*

Direct Photo Printing From Any Memory Card

Simply slide in the memory card into the card slot and print borderless photos easily without using a PC.

**3 Adapter required*

Card Direct Photo Printing with Easy Photo Index Sheet

With Canon's Photo Index Sheet, users can enjoy direct printing more easily. Print the Photo Index Sheet, and mark the photo/layout/ paper size/ etc you would like to print. The scanner then reads the sheet and automatically prints out the selected photographs. It is easier to use than most other Photo Index Sheets.

Looking Good

The MP370's compact, stylish design sits perfectly in your home or small office, and its sleek navy blue, Z-form body and aluminium cover lend an elegant touch. There's even a discreet dust cover to protect the memory card slot.

Dust cover

Enjoy Ultra Photo Quality And Fast Photo Printing

Reproduce the beauty of ultra photo quality faithfully. Thanks to the new MicroFine Droplet Technology, the MP370 print head ejects both microscopic 2pl and 5pl ink droplets simultaneously with extreme precision. The size of these tiny droplets, combined with 4800 x 1200 dpi printing resolution, results in images with smooth gradations, more accurate skin tones and rich, vibrant colours – giving you grain-free, real-to-life printouts.

Fast Printing Speed

The MP370 features a high-density, 1088-nozzle print head that allows you to print at lightning speeds of 18ppm in monochrome and up to 12ppm in colour.

Realistic Photo Quality

Canon's Advanced Digital Photo Colour Technology improves reproduction of favourable colours in your photos. This results in attractively and lively-coloured photographs. Images appear solid and real, and those of people feature natural skin tones.

4-Sided Borderless Prints

Think out of the box without borders! The MP370 prints borderless photos beautifully and quickly, and images are incredibly real. Choose from a variety of Canon media for your borderless photo printing and copying needs in sizes such as A4, 5 x 7" or 4 x 6".

Z-Lid

Control Panel

Superb, Fast Scanning

Hi-Resolution Scanning

The MP370 incorporates a high-resolution 1200 x 2400 dpi optical sensor with a 48-bit processor that is capable of recognising more than 281 trillion possible colours. This combination allows users to complete a variety of scanning tasks easily with brilliant results.

Superior Features

What's more, the MP370 is also packed with other useful features such as 3D scanning to give you super-realistic, lifelike scans. You can even scan a few images at a time with the One Pass Multi-Scan feature, and create your document files page-by-page into the same PDF file – useful for filing and document sharing.

Photo Quality Colour Copying

The MP370 can produce stand-alone copying at speeds of 18ppm in monochrome and 12ppm in colour. Reduction and enlargement features allow you to copy documents at any magnification from 25% to 400% in 1% increments. You can also make borderless copies in various sizes, from 4 x 6" right up to A4 size. Or choose to have fun with the 2-on-1 page, Fit-To-Page and Mirror Imaging features!

And That's Not All...

A host of value-added features make the MP370 even more convenient to use! These include the Automatic Tray that opens automatically when printing and copying, and the Advanced Z-Lid for scanning thick and bulky items. Plus with the user-friendly control panel that allows for one-touch operation, users can get things done easily and quickly.

Automatic Tray

Exceptional Photo Software Solutions!

The MP370 comes with a range of software that will make it simple for you and your family to adjust and enhance photo quality, and print brilliant digital photos – perfect for that family scrapbook! This includes Easy-PhotoPrint 2.0, Easy-PhotoPrint Plus, ArcSoft PhotoStudio and ScanSoft OmniPage. In addition, the Easy-WebPrint 2.0 software will eliminate the hassles of Web printing by automatically formatting your pages so they'll print properly in full colour, without trimming off the right hand margin.

Easy-PhotoPrint 2.0

This is the ultimate in photo printing software. The user-friendly interface and the simple operation method allows anyone to produce high-quality photo prints. It also supports **Exif Print 2.2** and **YCC Colour Space** for accurate colour reproduction.

New features

Sample image trimming using "The Rule of Thirds"

Original image
A typical composition with a centred photographic subject

Trimming in progress
While the dotted lines are displayed, dividing the screen into three parts vertically and horizontally, the subject is moved to the upper-right intersection.

Trimming complete
Make your subject appear more dynamic by cleaning a space in front of the line all movement.

Exif Print

Easy-PhotoPrint Plus

This advanced retouching software works in conjunction with Easy-PhotoPrint 2.0. It is specially designed for "Red-Eye Correction" and "Digital Face Smoothing", which reduces freckles, wrinkles and gives skin a smoother appearance. Corrected images have a beautifully natural look.

Easy-WebPrint 2.0

Canon's own webpage printing solution, now enhanced with more functions:

- **Auto-Link Printing** - multi links to be printed
- **Manual Content Size Adjustment** - for economical printing
- **Print Menu Display by right-clicking**
- **Selected Frame Printing** - only selected frame is printed
- **Grayscale Printing** - increases printing speed

Canon MP370 Specifications

PRINT	Speed:	Monochrome – 18 pages ⁴ /min • Colour – 12 pages ⁵ /min
	Resolution:	4800 x 1200 dpi
	Ink Droplet Size:	2pl and 5pl
	True Borderless Print:	4 x 6" / 5 x 7" / A4
SCAN	Type:	Flatbed Colour Scanner with CCD
	Optical Resolution:	1200 x 2400dpi
	Digital Resolution:	Up to 9600 x 9600dpi
	Scanning Colour:	9.9ms / line
	Speed: B/W/Grayscale:	1.65ms / line
	Scanning Bit Depth:	Colour: 16-bit input, 8-bit output for each colour (RGB) Grayscale: 16-bit input, 8-bit output
	Compatibility:	TVAIN / WIA (Win XP only)
COPY	Speed:	Monochrome – 18 pages ⁵ /min • Colour – 12 pages ⁵ /min
	Resolution:	Colour – 1200 x 1200dpi • Monochrome – 600 x 600dpi
	Number Of Copies:	1 – 99
	Reduction / Enlargement:	25% – 400%
	FCOT (first copy output):	1.1sec
